

AMENDMENTS TO THE SPECIFICATION

In the specification please replace the original paragraph with the following paragraph starting on page 6, line 21 and continuing on page 7. The word "automatically" is being deleted on page 7, line 1 of the specification.

If the MMS sending client 102 wants to send a multimedia message to the receiving client 104, the MMS sending client 102 submits an MMS capability query 112 relative to the receiving client 104 to the WV service 106. The MMS capability query 112 may be activated manually by a user of the MMS sending client 102 or may be automatically performed ~~automatically~~ by the MMS sending client 102 after the user of the MMS sending client has composed a multimedia message.
